**VIA HAND DELIVERY**

Mary L. Cottrell, Secretary  
Department of Telecommunications and Energy  
One South Station  
Boston, Massachusetts 02110

**RE: D.T.E. 01-28 (Phase I), Western Massachusetts Electric Company, Requested  
Information**

Dear Secretary Cottrell:

Pursuant to the Hearing Officer's November 29, 2001 Memorandum in the above-mentioned proceeding, Western Massachusetts Electric Company ("WMECO") hereby files the following information.

Since July of this year, for its Extended Metering Options tariff, MDTE No. 1037A, three customers have requested load pulse output service. Of these three load pulse output service customers, two customers are on Rate T-2 and one on Rate G-2. It should be noted that prior to this tariff, MDTE No. 1037A, WMECO was providing load pulse and phone service to approximately 30 customers and phone AMR service to approximately 20 customers. WMECO does not have rate class information on these customers at this time.

Since July of this year, for its Interval Load Data Services tariff, MDTE No. 1038A, eight customers have paid the \$76 fee for customer historical data after receiving an initial copy for free. Of these eight customers, four are served on Rate T-2, one on Rates S-1/T-2, one on Rates I-1/T-2, one on Rates G-0/T-2, and one on Rates ECD/T-2. In addition, five customers have requested the MDATA Online service. Of these five MDATA Online customers, three take service on Rate T-2, one on Rate G-2, and one on Rate T-4.

Very truly yours,

Donald M. Bishop  
Manager, Regulatory Policy - Massachusetts
